Subject Index to Volume 2

Acinar cell carcinoma, pancreas, 183–186
Actin, in lobular carcinoma in situ of breast, 219
Acute hypergranular promyelocytic leukemia, 389–393
Adenosine triphosphatase (ATPase), Mg^{2+}- and Ca^{2+}-dependent, in ejaculate of cystic fibrosis patients, 357
Afzelius, Björn, 312
Altenähr, Eberhard, 191
Alveolar soft part sarcoma, 383–388
Amelanotic melanoma, 378
Anal transitional zone, SEM and TEM of surface epithelium, 163–171
Anaplastic thyroid carcinoma, 121–128
Angiosarcoma, 320–323
Annulate lamellae, association with ribosome-lamella complex in chronic lymphocytic leukemia, 249–256
Astrocytoma, unidentified intracelluiar structures, 397–400
Auer rods, 389–390

Basal lamina, in epithelioid schwannoma, 21, 23
Benditt, Earl P., 91
Berger's disease (*see* IgA nephropathy)
Bischoff, Albert, 406
Bone, malignant fibrous histiocytoma, 33–42
Bone marrow cells, inclusions in, 389–393
Book reviews:

  Raikhlin, N. T., David, H., Lapis, K. (Eds): Ultrastructure of Tumours in Man (Guidebook on Diagnosis), 405
Breast disease:
  intracytoplasmic lumina, 327
  lobular carcinoma in situ, 219–230
Bronchial carcinoma, 202 (*See also* Neuroendocrine carcinoma)

Calcium:
  in cystic fibrosis fibroblasts, 54–57
  in ejaculate of cystic fibrosis patients, 357
Carcinoma:
  acinar cell, of pancreas, 183–186
  anaplastic, of thyroid, 121–128
  bronchial, 202–214
  lobular in situ, of breast, 219–230
  medullary, of thyroid, 203–216
  metastatic (*see* Metastatic carcinoma)
  neuroendocrine, 199–217
    of skin, 1–9, 202–212
  oat cell, 131–137
  skin, 1–9, 202–212
  solid follicular, 126–127
  transitional cell, of urinary bladder, 43–51
Case for the panel:
  eosinophilic bodies in the epidermis, 187–189
  foreign material in tissues of patients on recurrent dialysis, 401
  subacute sclerosing panencephalitis with unusual ultrastructural findings, 85
  unidentified intracellular structures in an astrocytoma, 397
  unidentified structures in tumor cells, 395
  vacuolated epithelial lesion in lung, 303
Castleman award, 313
CAT scan, craniopharyngioma, 344
Cell(s):
  bone marrow, 389–393
  cerebrospinal fluid, collection for EM, 175–181
  Cryptococcus neoformans, 180
  epithelioid, 258–264
  fibroblastlike, 35–36, 38
  giant, 81–83
    multinucleated, 39, 258–265
  histiocytes, 35–37
  macrophage, 272–274
  melanin-containing, 205–207
  melanosome, 199, 205
  Merkel, 1–9, 205
  myoepithelial, 219
  premelanosome, 205
  promyelocytes, 389
  Reed-Sternberg, 81–83
  transitional, 39, 40
  tumor, unidentified structures, 395
  undifferentiated, in malignant fibrous histiocytoma of bone, 36, 38–39
Central nervous system sarcoidosis, 257–262
Cerebellar pontine angle tumor, 318–320
Cerebrospinal fluid, cell collection for EM, 175–181
Chronic lymphocytic leukemia (CLL), coexistence of ribosome-lamella complexes and annulate lamellae, 249–256
Coin lesion, of lung, 289–294
Community hospital, diagnostic pathology in, ultrastructural and immunologic methods, 373–381
Craniopharyngioma, SEM, TEM, and x-ray microanalysis, 343–356
Cryoglobulinemia, mixed, 295–302
Cryptococcus neoformans cells, 180
Crystals, in gastric schwannoma, 139–144

Cyst(s), in craniopharyngioma, 345
Cystic fibrosis:
ejaculate analysis in, 357–362
fibroblasts, electrolyte redistribution in, 53–57

Diffuse membranous glomerulopathy, 374, 375
Dual differentiation, in oat cell carcinoma of lung, 131–137

Electron-dense deposits, in IgA nephropathy, 155–156
Electron microscopy:
acinar cell carcinoma of pancreas, 183–185
amelanotic melanoma, 378
anaplastic thyroid carcinoma, 122–127
angiosarcoma, 322
bone marrow cells, 389–391
central nervous system sarcoidosis, 257–267
coin lesion of lung, 289, 291–292
cryoglobulinemic lung disease, 297–300
CSF cell collection for, 175–181
in diagnostic pathology in community hospital, 373
the early years, 309–311
ejaculates of cystic fibrosis patients, 358
epidermal eosinophilic bodies, 189
epithelioid schwannoma, 19–24
foreign material in tissues of patients on recurrent hemodialysis, 401, 404
glomerulopathy, 375
hemangioblastoma, 320
idiopathic thrombocytopenic purpura, 270, 272–274
IgA nephropathy, 152, 153–158
immunoblastic sarcoma, 376
infantile digital fibromatosis, 242–247
inorganic inclusions in a muscle biopsy, 365–371
intracerebral ganglioneuroblastoma, 340–341
intracytoplasmic lumina, 329
latex particle ingestion by platelets, 277–287
lobular carcinoma in situ of breast, 220, 223–224, 228–229
malignant fibrous histiocytoma, 379
malignant melanoma, 148
malignant smooth muscle tumors of GI tract, 233–239
monocytic leukemia with cutaneous involvement, 13–17
neuroendocrine carcinoma, 204
of skin, 2, 5–8
oat cell carcinoma of lung, 132–136
pleomorphic xanthoastrocytoma, 26, 30–31
retroperitoneal tumor with vertebral metastases, 383, 385–388
sinus histiocytosis with massive lymphadenopathy, 103–118
spindle cell carcinoid, 377
thymoma, 380
tumor of thigh, 324
urinary bladder transitional cell carcinoma, 45–49
vacuolated epithelial lesions, 304–306
vaginal tumor, 318
Electron probe x-ray microanalysis, electrolyte redistribution in CF fibroblasts, 53–57
Emperipolesis, 118
Endoplasmic reticulum, in tumors, 395
Endothelial tumors, 315–325
Energy-dispersive x-ray analysis (*see* X-ray energy-dispersive analysis)
Eosinophilic bodies, epidermal, 187–189
Eosinophilic granulocyte, 178
Epidermis, eosinophilic bodies in, 187–189
Epithelioid cell, in CNS sarcoidosis, 258–264
Epithelioid schwannoma, 19–24
Epithelioid tumors, 231

Fibroblast(s), from cystic fibrosis patients, electrolyte redistribution in, 53–57
Fibroblastlike cells, in malignant fibrous histiocytoma of bone, 35–36, 38
Fontana-Masson reaction, in malignant melanoma, 147
Foreign material, in tissues of patients on recurrent hemodialysis, 401–404
Freeze-fracture study, latex particle uptake and open canalicular system of platelets, 277–287

Ganglioneuroblastoma, intracerebral, 337–342
Gastric schwannoma, crystals in, 139–144
Gastric tumor, 235–238
Gastroenteritis, rotavirus and, in mice, 59–79
Gastrointestinal tract, malignant smooth muscle tumors, 231–240
Ghadially, Feroze N., 407
Giant cell:
in Hodgkin's disease, 81–83
multinucleated, in malignant fibrous histiocytoma of bone, 39
Glial fibrillary acidic protein (GFAP), in pleomorphic xanthoastrocytoma, 29
Glomerular basement membrane, in IgA nephropathy, 157
Glomerulopathy, diffuse membranous, 374, 375
Glomus tumor, of lung, 289–294
Golgi complex, in irradiated urinary bladder transitional cell carcinoma, 43–51
Granuloma, in CNS sarcoidosis, 258–260

Hemangioblastoma, 319–320
Hemangioma, 316–318
Hemodialysis, recurrent, and foreign materials in tissues, 401–404
Histiocyte(s):
in malignant fibrous histiocytoma of bone, 35–37
in sinus histiocytosis with massive lymphadenopathy, 103–114
Histiocytoma, malignant fibrous, 33–42, 374, 378–380
Histochemistry, ultrastructural, infantile digital fibromatosis, 241–247

Hodgkin's disease, giant cell in, 81–83
Hypercalcemia, and malignant fibrous histiocytoma of bone, 42

Idiopathic thrombocytopenic purpura (ITP), 269–275
IgA nephropathy, 151–160
Immunoblastic sarcoma, 374, 376
Immunofluorescence technique:
  cryoglobulinemic lung disease, 301
  in diagnostic pathology in community hospital, 373
  IgA nephropathy, 152, 154
  immunoblastic sarcoma, 376
  indirect, murine rotavirus gastroenteritis, 62, 65–66
  lobular carcinoma in situ of breast, 220, 223–224, 227
Immunohistochemistry:
  cryoglobulinemic lung disease, 297, 300–301
  neuroendocrine carcinoma, 203, 209
Immunoperoxidase technique:
  cryoglobulinemic lung disease, 300, 301
  in diagnostic pathology in community hospital, 373
  lobular carcinoma in situ of breast, 220, 223–224, 227
  malignant fibrous histiocytoma, 379
  pleomorphic xanthoastrocytoma, 29
Immunoreactive peptides, in neuroendocrine carcinoma, 199
Inclusions:
  in bone marrow cells, 389–393
  cytoplasmic, in monocytic leukemia, 13–17
  inorganic, in muscle biopsy, 365–371
Infantile digital fibromatosis, 241–247
Intracytoplasmic lumina, in metastatic neoplasms, 327
Irradiation, and Golgi complex, in urinary bladder transitional cell carcinoma, 43–51

Journal review, Gay, S., Miller, E. J. (Eds): Collagen and Related Research: Clinical and Experimental, 195

Killam award, 407

Latex particle uptake, by platelets, 277–287
Leiomyosarcoma, sigmoid colon, 233
Letters, 93–94, 193–194, 408
Leukemia:
  acute hypergranular promyelocytic, 389–393
  chronic lymphocytic, 249
  monocytic, 11–17
Light microscopy:
  acinar cell carcinoma of pancreas, 184
  anaplastic thyroid carcinoma, 122–123
  angiosarcoma, 321
  bone marrow cells, 392
  central nervous system sarcoidosis, 258
  coin lesion of lung, 289–290
  cryoglobulinemic lung disease, 296–297, 300
  in diagnostic pathology in community hospital, 373
  epidermal eosinophilic bodies, 188
  epithelioid schwannoma, 20, 22
  glomerulopathy, 375
  hemangioblastoma, 319
  idiopathic thrombocytopenic purpura, 270–271
  IgA nephropathy, 152, 154
  immunoblastic sarcoma, 376
  infantile digital fibromatosis, 242–243
  intracerebral ganglioneuroblastoma, 339
  intracytoplasmic lumina, 329
  malignant fibrous histiocytoma of lung, 379
  malignant melanoma, 148
  malignant smooth muscle tumors of GI tract, 233
  monocytic leukemia with cutaneous involvement, 12
  murine rotavirus gastroenteritis, 61–64
  neuroendocrine carcinoma, 202–203
    of skin, 2–4
  oat cell carcinoma of lung, 132
  pleomorphic xanthoastrocytoma, 26–29
  retroperitoneal tumor with vertebral metastases, 383–384
  sinus histiocytosis with massive lymphadenopathy, 103–104
  thymoma, 380
  tumor of thigh, 323
  vacuolated epithelial lesion, 303
  vaginal tumor, 317
Liver metastasis, retroperitoneal tumor and, 183–186
Long-spaced collagen, in epithelioid schwannoma, 23
Lung:
  coin lesion, 289–294
  cryoglobulinemic disease, 295–302
  oat cell carcinoma, 131–137
  spindle cell carcinoid, 374
  vacuolated epithelial lesion, 303–307
Lymphadenopathy, massive, in sinus histiocytosis, 101–118

Macrophage, in idiopathic thrombocytopenic purpura, 272–274
Magnesium, in ejaculate of cystic fibrosis patients, 357
Malignant fibrous histiocytoma:
  of bone, 33–42
  of lung, 378–380
Malignant melanoma, 147–149
Malignant smooth muscle tumors of GI trace, 231–240
Medullary thyroid carcinoma, 203–216
Melanin synthesis, neuroendocrine carcinomas and, 199
Melanocytes, 199, 205
Melanoma:
  amelanotic, 378
  malignant, 147–149
Melanosomes, 199, 205
Merkel cell, 1–9, 205

Metastases:
liver, from retroperitoneal tumor, 183–186
vertebral, from retroperitoneal tumor, 383
Metastatic carcinoma, intracytoplasmic lumina in, 327
Microtubules, intracytoplasmic aggregates in intracerebral ganglioneuroblastoma, 337–342
Mixed cryoglobulinemia, respiratory insufficiency in, 295–302
Monocytic leukemia, cutaneous involvement, 11–18
Mouse, rotavirus infection, 59–79
Multinucleated giant cell, 39
in CNS sarcoidosis, 258–265
Murine rotavirus gastroenteritis, 59–79
Muscle biopsy, inorganic inclusions in, 365–371
Myoepithelial cell, in lobular carcinoma in situ of breast, 219–230

Neuroblastoma, 337–342
Neuroendocrine carcinoma, 199–217
of skin, 1–9
Neurosecretory-type granules, plus tonofilaments, in oat cell carcinoma of lung, 131–137

Oat cell carcinoma, dual differentiation, 131–137
Obituaries:
Altenähr, Eberhard, 191
Bischoff, Albert, 406
Open canalicular system (OCS) (*see* Platelets)

Pancreas, acinar cell carcinoma, 183–186
Particulates, in muscle biopsy, analysis, 365–371
Phagocytosis:
in idiopathic thrombocytopenic purpura, 269–274
latex particle uptake by platelets, 277–287
in sinus histiocytosis with massive lymphadenopathy, 101
Phase contrast microscopy, foreign material in tissues of patients on recurrent hemodialysis, 402
Phosphotungstic acid, in ultrastructural histochemistry of infantile digital fibromatosis, 241
Platelets:
open canalicular system, freeze-fracture and cytochemical study, 277–287
phagocytosis, in idiopathic thrombocytopenic purpura, 269–274
Pleomorphic xanthoastrocytoma, 25–32
Premelanosomes, 205
in malignant melanoma, 147–149
Promyelocytes, 389
Proplasmacyte, 177

Rectal tumor, 234
Reed-Sternberg cell, 81–83
Retroperitoneal tumor:
with liver metastases, 183–186
with vertebral metastases, 383–388
Ribosome-lamella complex (RLC):
association with lamellae in chronic lymphocytic leukemia, 249–256
in monocytic leukemia, 11–17
Rotavirus gastroenteritis, murine, 59–79
Rous-Whipple award, 91

Sarcoidosis, central nervous system, 257–262
Sarcoma:
alveolar soft part, 383–388
immunoblastic, 374, 376
Scanning electron microscopy (SEM):
anal transitional zone, 163–168, 172
craniopharyngioma, 345, 353–355
murine rotavirus gastroenteritis, 69–72, 75–79
Schwannoma:
epithelioid, 19–24
gastric, crystals in, 139–144
Seminal plasma analysis, in cystic fibrosis patients, 357–362
Sigmoid colon:
epithelioid cell tumor, 239
leiomyosarcoma, 233
Sinus histiocytosis with massive lymphadenopathy, 101–118
Skin:
carcinoma (*see* Neuroendocrine carcinoma)
in monocytic leukemia, 11–18
Sodium, in cystic fibrosis fibroblasts, 54–57
Spindle cell carcinoid, 374, 377
Spindle cell tumors, 231
Spleen, in idiopathic thrombocytopenic purpura, 269–274
Subacute sclerosing panencephalitis, 85–90
Subplasmalemmal linear densities, in CNS sarcoidosis, 259, 262–265

Thigh, tumor of, 323–324
Thymoma, 375, 380
Thyroid carcinoma:
anaplastic, 121–128
medullary, 203–216
Tissue specimens, handling and processing, 373
Tonofilaments, plus neurosecretory-type granules, in oat cell carcinoma of lung, 131–137
Transitional cell(s), in malignant fibrous histiocytoma of bone, 39, 40
Transitional cell carcinoma, urinary bladder, 43–51
Transmission electron microscopy (TEM):
anal transitional zone, 165, 168–169, 172
craniopharyngioma, 345–352
murine rotavirus gastroenteritis, 63–74
Tumor(s):
alveolar soft part sarcoma, 383–388
astrocytoma, 397–400
coin lesion of lung, 289–294
craniopharyngioma, 343–356
endothelial, 315
epithelioid, 231

Tumor(s) (*Cont.*):
epithelioid schwannoma, 19–24
ganglioneuroblastoma, intracerebral, 337–342
gastric schwannoma, 139–144
glomus, 289–294
immunoblastic sarcoma, 374, 376
malignant fibrous histiocytoma: of bone, 33–42
of lung, 374, 379
malignant smooth muscle of GI tract, 231–240
neuroendocrine carcinoma of skin, 1–9
pleomorphic xanthoastrocytoma, 25–32
retroperitoneal: with liver metastases, 183–186
with vertebral metastases, 383–388
spindle cell, 231, 374, 377
of thigh, 323–324
vaginal, 316–318
vacuolated epithelial lesion of lung, 303–307
Tumor cells, unidentified structures in, 395

Ultrastructure:
anal transitional zone, 163–173
anaplastic thyroid carcinoma, 121–128
chronic lymphocytic leukemia, 249–256
endothelial tumors, 315
eosinophilic granulocyte, 178
gastric schwannoma, 139–144
inorganic inclusions in a muscle biopsy, 365–371
intracerebral ganglioneuroblastoma, 337–342
lobular carcinoma in situ of breast, 219–230
malignant fibrous histiocytoma, of bone, 33–42
monocytic leukemia, 13–17
neuroeodocrine carcinoma of skin, 1–9
pleomorphic xanthoastrocytoma, 25–32
proplasmacyte, 177
smooth muscle tumors of GI tract, 231–240
subacute sclerosing panencephalitis, 85–90
Ultrastructural biochemistry, infantile digital fibromatosis, 241–247
Urinary bladder, transitional cell carcinoma, 43–51

Vagina, tumor, 316–318
Vertebrae, metastases from retroperitoneal tumor, 383

Warnke, Roger, 313
Weibel-Palade body, 315–325

Xanthoastrocytoma, pleomorphic, 25–32
X-ray energy-dispersive analysis:
craniopharyngioma, 345, 356
muscle biopsy, 365–371

Zinc, in ejaculate of cystic fibrosis patients, 357
